

Industrial Mechanical Automation Ltd is comprised of professionals that can take on any complex conveying project and hand it back to you in the condition of a turn key conveying operation.

We can customize conveyor to any configuration to meet your needs.

Installations can always be accomplished around production schedules limiting interruptions in revenue.

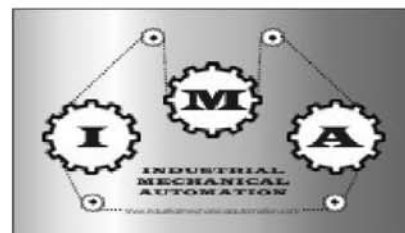

***Customized Standards Focused on
Future***

Our experience and high standards of our own "in house" made product, allow us to ensure customer satisfaction regarding every detail.

We expect excellent standards of quality and production of container handling conveyor, including sanitary stainless steel, mass and high speed container conveyor.

We can make all your projects more cost effective than our competitors due to low overhead structure and our physical location.

FAT Savvy

"Industrial Mechanical Automation, Ltd. did a great job installing Avita Water's new water bottling line, including a monoblock counter pressure filler/capper, tray maker, shrink wrapper, and custom built conveyors associated with the line. I can highly recommend Mike Holmes and his company."

- Terry Maurer/Managing Director, Avita Artesian Water, LLC.

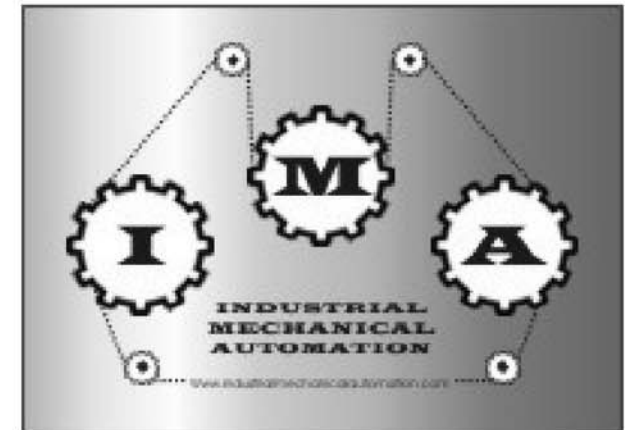

"Industrial Mechanical Automation was quick, efficient and on time. Extras initiated by me were reasonably priced and completed very timely. Thank you for a job well done."

- Greg Montag/ Branch Manager Culligan Southwestern Ontario

"During my experience with Industrial Mechanical Automation Ltd weather it is complete plant operations disassembly or installation / specific pieces of equipment and their components removal, re built or re-installed; IMA has always been economically competitive and adhere to schedule."
