

***Matthews International is proud to present the following proposal
of our I-Mark™ SX32 Printing System***

Ms. Melissa Holmes
Industrial Mechanical Automation
Grafton, Ontario

Quotation Number:	IMA-080310
Date:	August 3, 2010

Statement of Application

We offer the Matthews I-Mark SX32 Ink-Jet controller with one 16 valve MIDI print head (8000 type) to produce date and product code (alphanumeric) mark consisting of one or two lines of information onto the paper or carton surface.

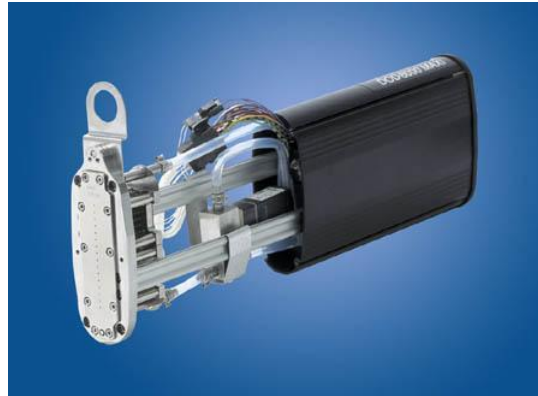

A typical message will be “ABCDEFGH” with a character size from 6 mm to 28 mm each line. Line speed will be about 50 fpm (Maximum speed up to 400 fpm). Continual web applications or variable line speeds will require the use of an encoder for proper message spacing and a consistent image. The recommended ink type is water based black ink. The expected dry time on the product depends on the absorption rate of the surface.

Printed sample marks could be provided and are indicative of the print quality and adhesion capabilities of the Matthews SX32 printing system.

In providing this solution, Matthews will be responsible for supplying the equipment while CUSTOMER will be responsible for electrical connections and plant air. Mounting brackets will be the responsibility of CUSTOMER if required. “Clean “electrical power to be provided. All necessary engineering drawings will be supplied.

Matthews I-Mark SX32 will provide you with the following benefits:

- Password protection
- Icon based menu system
- Runs 32 Valves

Investment Summary

MATW Part No.	Description	Price Ea.	Quantity	Extended
*40000603	I-Mark SX-32e CONTROL UNIT (12V,100-240V, 50-60Hz)		1	
*40000651	8000 Printhead - 16 Valve Midi Drop Waterbased (SCP300A)		2	
*40000207	SX32e/V84 Printhead Cable, 8000 Series, 7 or 16 V 10ft.		1	
*40000595	HP Ink and Cleaner Module - 2 X 1 Liter, 120V		1	
*40000512	Large Capacity Ink Systems (LCIS)		1	
*40000058	Eliminizer (one required for each airline feeding system)		1	
*40000005	Photocell with 10' cable and bracket		1	
40000189	Heavier duty standard speed encoder (16 ft. [5m] cable), 5000 ppr		1	
40000600	Spring loaded encoder holder		1	
40000598	Encoder wheel - 0.2m circum. for 40000189 and 40000197		1	
Total (USD):				\$12,257.00

Note: 10% OEM Discount is applicable if end user is identified.

Services:

Description	Unit	Price Ea.	Qty.	Extended
Start-up assistance (8AM-5PM, Monday – Friday)	Day	1,100.00	1	\$ 1,100.00
Travel/ Hotel/Meal expenses (actual receipts submitted). No Charge for Travel time.				

ABOVE PRICES IN USD DOLLARS valid for 30 days from “Date of Quote “
